Subject : electronic harassment over 220 VAC

Hi,

What I have come to understand over the past months is that the criminals, who want to take western society down, are part and parcel of the electricity industry. The Enron's and foremost their Russian, Chinese and Indian counterparts.

What i have discovered is that besides the usual electricity feed of 220 VAC to your household, these fellers send something extra, which is not of the same frequency, but fluctuates. This extra "electricity" has special hidden purposes unknown to the commoners. I don't have absolute proof but i suspect that the extra "electricity" is part of remote harassment which has frequencies which hookup into sensitive parts of the human brain, with ultimate goal abusive mind-control. This extra "electricity" feed is, I think, what some people have described as Orgone energy.

[Franz Anton Mesmer called it animal magnetism; Charles von Reichenbach called it odyle. To Henri Bergson it was the elan vital, the "vital force;" while to Hans Driesch it was the entelechy . Sigmund Freud observed its functioning in human emotions and termed it libido. William MacDougall, the great British - American psychologist of a generation ago, labeled it hormic](#)

energy. Dozens, if not hundreds, of lesser - known scientists have recognized its presence and have given it a name to characterize its special properties. Among the 20th-century proponents of the concept are, for example, Doctors Charles Littlefield and his vital magnetism and George StarrWhite and his cosmo-electric energy . Mechanistic science in the 17th through 19th centuries embraced many of its essential qualities in the concept of the ether, while mystical human beings have embraced other essential qualities of it in the concept of god.

Orgone energy is Wilhelm Reich's name for the substratum from which all nature is created. The best definition this author can provide for it is this: Orgone energy is the creative force in nature. This article will discuss briefly the history of the discovery of orgone energy by Reich and will describe its properties. It will then summarize the evidence for and against the concept and, finally, will undertake to explain why it is that the concept meets such great resistance.

Reich's Discovery of Orgone Energy

Orgone energy was originally discovered by Wilhelm Reich in his psychiatric work. As a psychoanalyst and student of Freud, Reich's point of departure was, quite naturally, Freud's concept of "libido. " "Libido" is life energy, desire, the source of human striving. Reich developed the libido concept, concentrating on its physical expression and simultaneous psychological content, until he was able to show the relation of bodily attitude and emotion. This he described in CHARACTER ANALYSIS, a book which went further than any work in history in

solving the mystery of the relation' of mind and body. In this great book Reich also described the mass pathology of the animal man, This pathology consists of a chronic rigidity of the musculature which blocks the movement of energy underlying emotion and hence blocks the emotion, thus providing the psychic or emotional underpinning of mankind's universal sickness.

Reich's initial work on orgone energy was done, then, in depth psychology. From this it spread, quite naturally, into sociology and political science, for Reich saw quite clearly that the sickness of man was socially or culturally transmitted. His books, THE MASS PSYCHOLOGY OF FASCISM, THE SEXUAL REVOLUTION and PEOPLE IN TROUBLE deal with this enlargement of his depth psychological discoveries to the social and political scene.

It was natural for a mind like Reich's to generalize and deepen his understanding of libidinal energy, and as he did his medical work expanded beyond the field of psychiatry into more general areas of medicine and biology. The concept of libidinal energy developed into the more concrete concept of "bioelectricity," which soon proved not to be electricity and in time was renamed "orgone energy." Books dealing with this phase of Reich's discoveries are

THE FUNCTION OF THE ORGASM and THE CANCER BIOPATHY. These books constitute Volumes 1 and 2 of THE DISCOVERY OF THE ORGONE, Reich's presentation to the world of the discovery of orgone energy.

Although orgone energy was first discovered in the human body, Reich learned through painstaking observation and experiment that it existed in free form in the atmosphere. With this finding, Reich's work transcended the boundaries of biology and entered the realm of meteorology and atmospheric physics."

One very effective method to simply annihilate the unregulated "Orgone" part of your electricity feed to your house, is by using multiple socket lines with surge protection and mains filter, to hookup your TV, PC and other electrical equipment which has interactive input to your six senses. This i didn't write. Who said that? The Sp^{ym}aster? Makes sense if one identifies Orgone enery as a positive energy which heals people, makes em stronger and makes things grow. Heh, if we switch off that extra "electricity" feed, we all become Giants?

Cheers,

Robert

Another important observation, concerning TV equipment, is that if you don't have a CABLE FREE TV-signal, they will send unregulated "electricity" through the CABLE ANTENNA and use that Voltage/Amperage as source for their heinous game. I just measured at least 220 VAC on my CABLE ATTENNA !

So if you really want to watch TV without "Orgone" harassment you will need a CABLE FREE TV-signal, like e.g. Satellite Dish or the old-fashioned antenna on your roof top. It certainly makes sense as the authorities since 2002 have shutdown the Dutch LOPIK TV-tower transmitter. The 80 - 110 MHz FM radio stations are still around though.

UPDATE 3

Although (and even _IF_) your electronics equipment is connected with multiple socket lines with surge protection and mains filter, the occasion might arise that your equipment (typically a home video theater or PC with audio output) and its connected speakers, or sort-alike devices with magnetic coils, can still be manipulated to such an extent that the magnetic coils start sending the unregulated "negative Orgone" energy part. This unregulated emitting typically happens when the equipment is in 'standby' mode or while the equipment is powered down, even when 220 VAC mains (filtered or not) is still connected.

Not all electronics equipment featuring magnetic coils (audio speakers) are affected though. Typically, more recent equipment from Far-East electronics equipment manufacturers have this hidden capability. So are all PC motherboards produced in the Far-East a prime suspect. A friend recently mentioned that today almost all PC mainboards are manufactured by Foxcon in China, even if the PC's and Laptops themselves are 'produced' by premier retailers like HP/ IBM/ Dell etc. Today the Foxcon job seems to have been extended to all home electronics equipment.
